

Seldon WaterBox™ Filtration System

Mobile and Remote Applications

The Seldon WaterBox™ portable water filtration system combines safety and simplicity for a variety of mobile or remote drinking water and light commercial applications. Utilizing Seldon's patented Nanomesh™ media technology, this self contained, two-filter unit is capable of removing particulate and harmful microbial contaminants from any source water while leaving many of the healthy minerals. Users appreciate the plug-and-use design which uses no chemicals and does not produce a waste stream. This robust, portable design also allows for a variety of applications such as; military, disaster relief, humanitarian, outdoor, recreational, and light commercial. Simply put, Seldon filtered water tastes great.

Features:

- Patented Nanomesh™ filter media technology
- Two-stage, high capacity filter system
- Robust construction – water tight rugged case with wheels and handle
- Includes 10 prefilter and 2 Nanomesh™ main filters for extended remote use
- One year warranty

Benefits:

- Assured removal of bacteria, virus, Cryptosporidium and Giardia
- Easy to install and use – plug into any power source
- Environmentally friendly – no chemicals or waste water
- Long life and cost effective

Filtration Performance:

- Removal of bacteria, virus, Cryptosporidium and Giardia to EPA drinking water standards (99.9999% bacteria, 99.99% virus and 99.9% cysts on NSF P231 Type 1 water)
- Removes organic contaminants (TOC's) that affect taste and odor.
- Partial removal of chemicals and heavy metals (e.g. arsenic, mercury and lead)

See website for full list of contaminants

Specifications:

- Capacity: 1200 gallons* (4,500L) or about 6 months on typical potable water
- Flow Rate: 0.6 gallons (2.3L) per minute
- Water Pressure: Requires a minimum of 15 PSI, 60 PSI maximum operating pressure
- Dimensions: 24.6" length x 19.7" width x 14.4" height (62.4cm x 50cm x 36.5cm)
- Weight: 64 pounds (29 Kg)
- Pump motor available in 230 VAC, 115 VAC, 12 VDC
- Accessories: Manual pump and power inverters available

*Capacity depending upon input water quality. Seldon Nanomesh™ technology has been tested by an independent EPA certified lab.
